THE FAMILIES GUIDE · VERSION 2.1

My Learning GPS **at home**

Help your child notice how they learn, two minutes a day, and see their week with anything that needs you at the top. Dr Timi Hyacinth's Learning GPS, for your family.

Aged 10 and over

Their own private link: a Daily Pulse, a Friday Reflection and a GPS Check.

Under 10

The Weekly Learning Chat: seven questions you read aloud together.

You

Their week on your dashboard, with anything that needs you first.

Private

Your child's answers are seen by you and nobody else.

Today's Daily Pulse

How hard did you push yourself today?

1 - Coasted 2 - A little 3 - Some
4 - A lot 5 - Everything I had

Describe your day in one word
For example: focused, drained, proud, curious

Traffic light your day

Green a good day Amber an okay day Red a hard day

Which subject did you focus on most? (optional)
Choose a subject...

What got in your way today? (optional)

Nothing really
My phone or other distractions
I didn't understand the work
I was tired or low on energy
Something with friends or at home
Something else

Today's Daily Pulse

Done for today. Effort 4 (a lot), your word was busy, and a green day.
Change today's Pulse

Friday Reflection

Opens on Thursday. About ten minutes, to look back at your week and plan the next one.

My GPS Checks

For a topic or test: where am I now, where am I going, how do I get there, and my next steps. Add your result when it comes back.
Start a GPS Check

My month

Once a month: how I learn, how I am, and one goal for the month. About ten minutes.
Do my monthly check-in

Your parent sees your answers. If something is worrying you at home, talk to a teacher or another adult you trust. My Learning GPS © Dr Timi Hyacinth / AFRIBADE. All rights reserved.

What is in this guide

★	How it works	2	3	A child under 10	6
N	Prices, and getting it	3	4	Your view, emails and help	7
1	Add your children	4	5	Ground control on Paddi Dash	8
2	A child aged 10 or over	5			

THE BIG PICTURE

★ How it works

Your child notices how they learn. You see it, and talk about it.
Nobody else reads it.

Why parents love it

-  **Know how they're really doing**
Confidence, effort and what they're stuck on, not just marks.
-  **Anything that needs you, first**
If they ask to talk, you are emailed at once.
-  **A skill for life**
Children learn to notice how they learn, and plan.
-  **Conversations, not interrogations**
Their answers give you a gentle way in.

Does your child's school use Learning GPS?

Then your child uses the school's, with their form teacher. My Learning GPS at home is for families whose school doesn't, or for children who aren't at school.

PRICES

N Prices, and getting it

A term at a time, for each child. Nothing renews by itself: we email you two weeks before it ends.

Scan to get it

EACH CHILD

₦1,500 a term

£3 / \$5 abroad

TWO CHILDREN

₦3,000 a term

One price for each child you add.

1 Choose it

At promptpaddijunior.com/learning-gps, under **Get Learning GPS for your family**: type each child's first name and stage, and tick

Yes, add Learning GPS for my family

2 Pay once

Card, bank app or USSD with Paystack, or a bank transfer; abroad, by card in pounds or dollars. It switches on when the payment is confirmed.

3 Find it on your dashboard

Sign in at [Parent login](#). **My Learning GPS** is on your dashboard. (Some families who subscribed early have a free first term: tap

Start my free term if you see it.)

My Learning GPS at home, and buying it for two children.

Giving it as a gift?

A grandparent or relative abroad can pay for it at promptpaddijunior.com/gift. We email everything to you.

PART 1

1 Add your children

Once. A first name and an age group for each child.

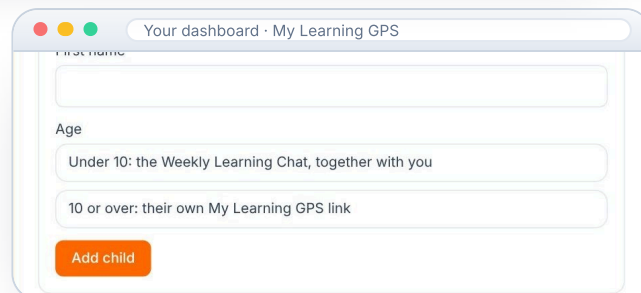

Sign in: /parent/login

1 Add a child

Under **My Learning GPS** on your dashboard, type your child's first name, choose their age group, and tap **Add child**:

- **Under 10:** the Weekly Learning Chat, together with you.
- **10 or over:** their own My Learning GPS link.

Add a child.

2 An older child: give them their link

Open **{name}'s link and QR code**. Scan the QR code on their phone or tablet and add the page to the home screen. There is no password: the link is theirs, so keep it private. If it is shared, tap **New link**.

3 A younger child: plan your chat

Pick a quiet time each week, about five minutes. You'll find **Have this week's chat** under their name.

Another child later?

Add them for ₦1,500 a term (£3 / \$5). On one of the older yearly family plans? You keep it until it ends, then renew for each child, a term at a time.

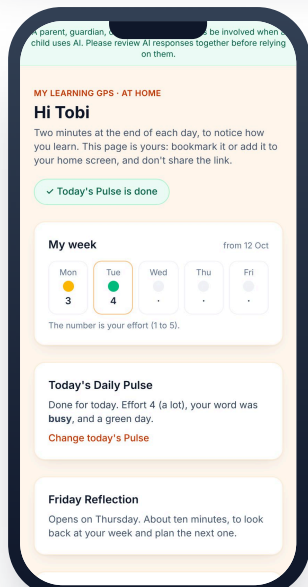

PART 2

2 A child aged 10 or over

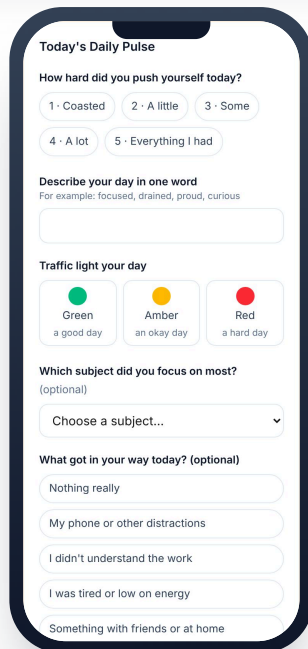

Their own page, on any phone or tablet. Two minutes a day, ten on Fridays.

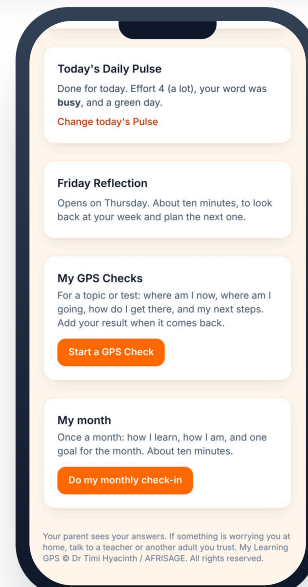

About My Learning
GPS

Their page: "Hi Tobii".

Today's Daily Pulse.

Done for today, and what's next.

The Daily Pulse

At the end of the school day: how hard I pushed myself (1 to 5), my day in one word, a traffic light, the subject I focused on, and what got in the way. [Save today's Pulse](#).

The Friday Reflection

Opens on Thursday. My biggest win, what was hardest, the strategy that helped, one thing to do differently, how the week felt, and whether I need you.

The GPS Check

For a topic or test: where am I now, where am I going, how do I get there, my next steps. Later, the result. Once a month, **My month**.

Make it a habit

Same time each day, for example straight after homework. Praise the honesty, not the scores: "a red day" is useful to know.

If they ask to talk

If your child answers "I'd like to talk to someone about how I'm feeling", or rates their week 1, we email you at once: please find a quiet moment today.

PART 3

3 A child under 10

The Weekly Learning Chat: you read seven questions aloud together, about five minutes once a week.

Sign in: /parent/login

1 Sit somewhere quiet together

No rush, no screens for them: you hold the phone.

2 Open this week's chat

On your dashboard, under their name, tap **Have this week's chat**.

3 Read each question aloud

What went well, anything hard or confusing, what colour school was this week, one thing they learned, what they'd like to try, and whether they want their teacher to know anything. Type their answers as they say them.

4 Save it

Tap **Save this week's chat**. The weeks build up under their name, with the colour of each.

This week's chat with Ada-Grace

▼ Have this week's chat

Sit somewhere quiet together. Read each question to Ada-Grace and record their answer. It takes about 5 minutes.

THIS WEEK

1. What's one thing that happened at school this week that you felt good about?
If they're stuck: was there a lesson where something clicked? Did you help a friend? Did you finish something difficult?

2. Was there anything this week that felt hard or confusing? (optional)

Yes: maths or numbers

Yes: reading or writing

Yes: understanding what I was meant to do

Yes: something with friends or at break time

Yes: something else

No, nothing was too hard this week

3. If school was a colour this week, what colour would it be?
There is no right answer. Go with Ada-Grace's first thought.

Bright yellow or orange: happy, excited

Green: calm, doing fine

Blue: a bit quiet or unsure

Grey or brown: tired or bored

Red or black: really hard, upset

4. What is one thing you actually learned or found interesting this week? (optional)

The Weekly Learning Chat.

PART 4

4

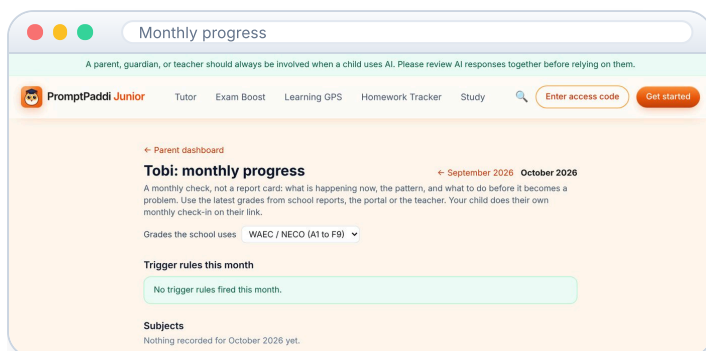

Your view, emails and help

Everything on your dashboard, under My Learning GPS.

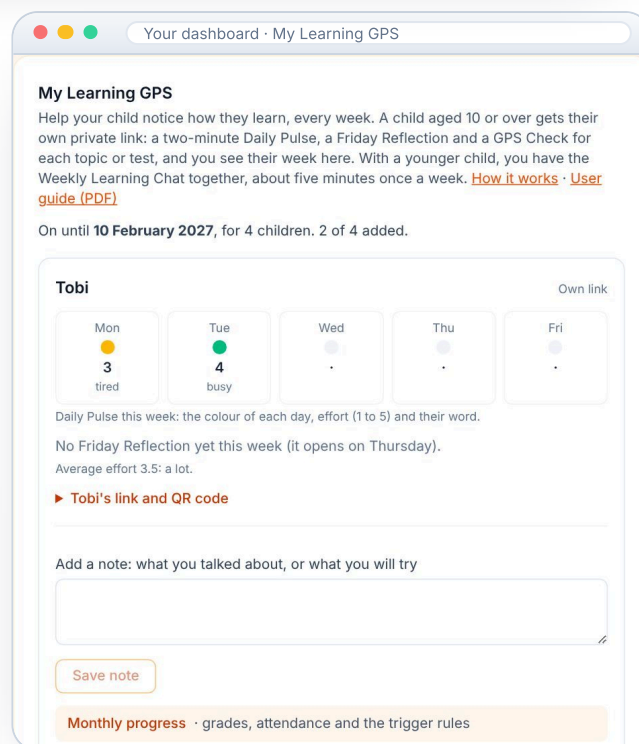

Sign in: /parent/login

- **Their week:** each day's colour, effort and word, the Friday Reflection, and the average effort.
- **Your notes:** under each child, **Add a note:** what you talked about, or what you will try.
- **Monthly progress:** once a month, record the latest grades from school reports, attendance and effort. Your child does their monthly check-in from their link. The trigger rules show when it is time to talk with the school.

Monthly progress at home.

Tobi's week, and Ada-Grace's chat.

The emails you receive

Your child asks to talk, or rates their week 1	At once: please find a quiet moment to talk today
A wellbeing score of 1 in their monthly check-in	At once: talk with them, and speak to their school's pastoral team
Fridays	Your family's week: whose chat is waiting, and how the week went (switch it off on your dashboard; urgent emails are always sent)
Two weeks before your term ends	A reminder, with a Renew link: renewing early adds a term from your end date

Keeping it safe

Your child's answers are seen by you and nobody else. If something they write worries you about their safety or wellbeing, speak to their school or a health professional. Listen first, and let them know you are glad they told you. Need help? Tap **Need help?** on any page, email hello@promptpaddijunior.com, or WhatsApp [+234 705 567 1509](tel:+2347055671509).

PART 5

5

Ground control on Paddi Dash

My Learning GPS is one part of your family's free Paddi Dash: its **Ground control**.

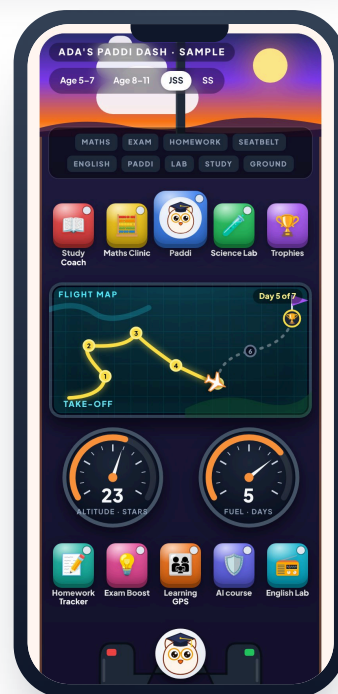

Free Paddi Dash:
promptpaddijunior.com

Paddi Dash is one free dashboard for everything your child learns: no card, two minutes to set up. Each child gets their own dash on a private link. Each thing you buy switches on its part, like a plane's cockpit, and every part has a free sample to try first.

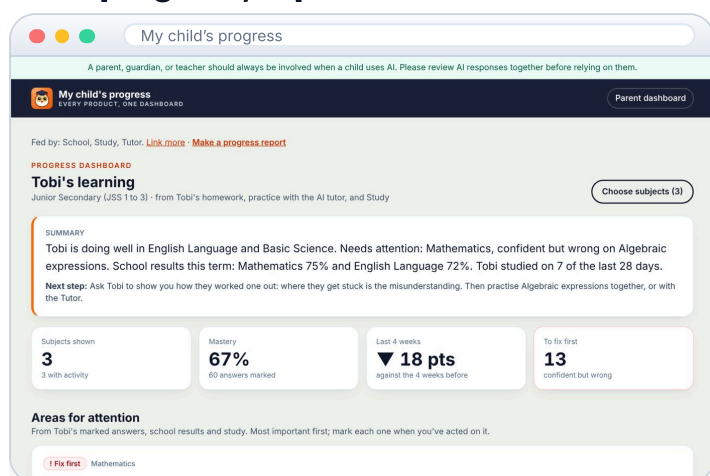

- **Ground control** is My Learning GPS: how your child's days and weeks are going.
- **Stars this week** against a target, and the **days learnt** this week.
- A **trophy cabinet** of every star they have earned.
- **Warning lights**, for example "2 gaps to fix", and **today's first step**.

It changes with age: bright colours and simple words for little ones, the numbers for older pupils. On your child's phone or tablet, open their link and choose **Add to Home Screen** (on an iPhone or iPad: Share, then Add to Home Screen). It opens like an app, with their name on it.

A child's Paddi Dash (a sample). Learning GPS is at the bottom.

Their progress, in plain words

The progress dashboard for one child.

The progress dashboard gathers everything your child does: a summary in plain words, mastery from every marked answer, the last 4 weeks against the 4 before, and what to fix first. Each area for attention has a suggested next step.

The Paddi Dash Guide

Every part of the dash, step by step:
